

**Spam now accounts for more than 85% of all email traffic.**

MX LOGIC® THREAT CENTER

**30-40% of Internet browsing is non-job related.**

SANS INSTITUTE

**“The MX Logic email filtering service blew reviewers away with its simple and comprehensive management interface, high accuracy rates and distinctive features.”**

CRN, APRIL 2008

## MX Logic® About MX Logic

Businesses that rely on the Internet need around-the-clock protection from today's quickly-evolving online threats – from spam and viruses to spyware and fraudulent phishing attacks. Unfortunately, many businesses do not have the IT resources or expertise necessary to manage and maintain effective online security solutions.

That's why businesses, state and local governments, and educational institutions worldwide trust MX Logic to protect their networks against converging email and Web threats with our effective, reliable solutions, which are easy to administer and use, and help organizations to:

- **Reduce business disruption**
- **Safeguard the integrity of business communications**
- **Increase employee productivity**
- **Lower IT costs associated with Web and email threat management**

### AWARD-WINNING MANAGED SECURITY SERVICES PROVIDER

Headquartered in Englewood, Colo., MX Logic is a leading managed security services provider of email and Web security services. MX Logic patented technology and commitment to creating the most user-friendly security solutions in the industry make MX Logic the appropriate choice for businesses that want enterprise-grade service and performance without enterprise-level complexity and cost.

MX Logic recent distinctions include earning the 2008 SC Finalist Award, the 2008 Gold Five-Star Award Winner by VARBusiness Magazine, and first place in the initial set of CRN's Head-to-Head Security Reviews.

### MX LOGIC EMAIL AND WEB SECURITY SERVICES

All MX Logic online security services offer easy administration and use, are backed by industry-leading threat expertise, and are highly effective in protecting businesses from a wide range of email and Web threats. Our suite of disaster recovery services help businesses manage their important email communications during outages. In addition, MX Logic® Message Archiving and MX Logic® Disaster Recovery provide businesses with email continuity and allow them to monitor, store and retrieve company email messages in order to comply with electronic security regulations. With services provided through a direct channel and an extensive partner network, businesses like EnCana, InfoUSA, Internet Initiative Japan, MFS Investment Services, ServiceMaster, and YMCA maintain healthy networks today through MX Logic automated and flexible email and Web threat protection.

## HIGHLIGHTS

- Award-winning service
- Filtering billions of messages a month for over 30,000 customers

**More than 65% of PCs are infected with some kind of spyware – many within minutes of being turned on for the first time.**

SANS INSTITUTE

### MX Logic® Email Defense Service

Comprehensive protection against a wide range of email threats using a combination of proven spam filters, leading anti-virus engines, fraud protection, content filtering, and email attack protection.

### MX Logic® Disaster Recovery Services

Protects against message loss during planned or unplanned email outages and offers the ability to stay connected via Web-based email access, management and use.

### MX Logic® Message Archiving

Easy to implement, highly scalable, reliable and secure way to ensure long-term storage with online advanced service options and retrieval capabilities.

### MX Logic® Web Defense Service

Effectively blocks quickly evolving Web threats, including spyware, viruses and phishing attacks, while enabling greater control over unauthorized Web surfing by employees.

## MX LOGIC® THREAT CENTER INTEGRATES HUMAN INTELLIGENCE WITH TECHNOLOGY

Powering our online security solutions is the MX Logic® Threat Center where our experienced security experts monitor the global state of email and Web traffic around the clock to provide customers with real-time updates and protection. The Threat Center provides dynamic defense staying far ahead of the next attack by continually incorporating information about the very latest spammer, virus and worm tactics.

## CONTINUALLY-UPDATED, LAYERED PROTECTION

Working behind the scenes to block threats at the network perimeter, the multi-layered technologies that power MX Logic email and Web security solutions complement and fortify your existing network and desktop security solutions to provide maximum protection against a wide range of quickly-evolving threats. As new threats emerge, new solutions developed by MX Logic or one of our industry-leading technology partners can be quickly put into place to defend our customers.

Find out more about how MX Logic is making it easier for businesses to increase online security and decrease the waste associated with spam, viruses and worms, and other Web-based threats by calling 1.877.MXLOGIC or visiting us at [www.mxlogic.com](http://www.mxlogic.com).
