

Schüco Solar Thermal Packages

Premium Line and Slim Line Packages

Schüco offers solar thermal packages optimized for various residential applications. They include everything needed for domestic hot water, and feature fast installation, reliability, efficiency, and good looks on the roof and in the house. The Premium Line Packages offer ultimate system efficiencies, highest quality fittings, rounded edges and state-of-the-art design. Packages come with Schüco's SolarEZ mounting system. The collectors can be ordered in silver or bronze frame colors.

The Slim Line Packages are designed for minimal visual impact on the roof, while maintaining high Schüco quality standards. The dark anodized collector frames are barely two inches thick, and can be mounted flush on the roof. All packages are designed for North American conditions and manufactured with uncompromising Schüco quality, to work reliably for years to come. The collectors are backed by a ten-year performance warranty.

Like all Schüco solar products, these packages are intended only for professional installation by a certified Schüco dealer.

SCHÜCO

Package Contents

Slim Line Package II-80
Hot water for up to 3 people
Includes:
2 Slim V Collectors
Collector Connection Set
80 HE-1 Solar Storage Tank

Features

Collectors

- Face of hail-proof tempered safety glass.
- Frames of anodized, corrosion-proof aluminum.
- Sunselect absorber coating and generous insulation for high efficiency.

Premium V Collector

Slim V Collector

Tank

- Double-enameled hot water storage tank for maximum corrosion protection and highest water quality.

80 / 105 HE-1
Storage Tank

Expansion Tank 4.7
(incl. wall-bracket & flexible pipe)

Solar Station and Controller

- Preassembled Solar Station includes pump, valves, and connecting pipes, and can be mounted directly on the tank. No soldering necessary for installation.
- System controller shows energy yield and system temperatures on a digital display.

Complete Solar Station
(incl. connection pipe)

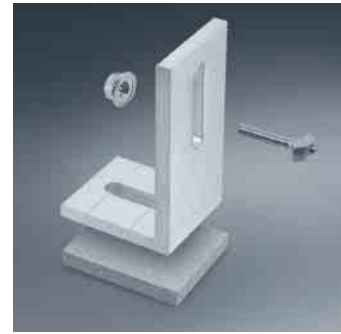

DeltaSol Controller

Mounting System

- SolarEZ mounting system with pre-cut ezRails and stainless steel hardware for fast, easy, rock-solid installation (with Premium Line Packages).
- Optional ezRoof Anchors make installation on tile roofs easy (included in Premium Line packages).
- ezFlush-Mounts for collector installation close to roof (with Slim Line Packages).

Premium Mounting Kit 2 / 3
(only in Premium Line Packages)

ezL Stand-Off Set
(only in Premium Line Packages)

Options

- Optional charging station makes system start-up easy and fast. Eliminates need for system ventilation on the roof.
- Optional collector strap makes handling easier.
- Optional insulated double pipe line set and connection kit for fast connection of collector array and solar station.

ezFlush Mount Set
(only in Slim Line Packages)

Charging Station
(optional)

Collector Strap
(optional; collector not included)

Line Set
(optional)
